STATISTICAL INFORMATION TABLES

This report provides general statistical information pertaining to "homes for special care" as defined under the Canada Assistance Plan. These are residential welfare institutions which have been listed in Schedule "A" to the federal-provincial agreements for federal sharing in 50% of eligible costs incurred by the provinces on behalf of needy residents therein. Hospitals, correctional institutions or institutions whose primary purpose is education are excluded, as the definition of homes for special care excludes such facilities. However, that part of a hospital which is used as a residential welfare institution is included in the definition.

Requests for the listings of institutions as homes for special care are received from the provinces at their discretion.

Tables 6 and 9 give the distribution of beds by level of care. This includes homes where the distribution of beds by level of care was not available and therefore has been estimated by a standard procedure: the total number of beds was evenly divided between all applicable levels of care. (If the total could not be evenly divided, the remainder is divided and added to as many levels as necessary, starting from the first one.)

Because Tables 6 and 9 include estimated data, Table 12 was added, giving number of homes and estimated distribution of beds by level of care.
